BYOD Program – iTunes Account

Dear Parents,

Thank you for your support of the program. We would like to re-state that this is not a compulsory program but an opt-in at any time. As we get underway with our BYOD Program there are a few things that will help get the children up and running as soon as possible.

Use your child's school email account when setting up devices

Remember that your child has a school based gmail account. You **do not** need to create an email account. If you don't know this please ask your child's teacher.

For children using iPads

1. **Create an iTunes Account:** Please make sure that you have either:
 - i. **created an account** using your child's school email address (do not create a new gmail account). Instructions for this were included in your pack last year. It is important to set it up on a computer so that it does not have a credit card attached to the account.

OR

- ii. **Set up Family Sharing**

2. Download the **AirWatch Agent** from the App Store. This is how your child will be able to access the internet at school. When your child registers their iPad at school it will download an app called APP Catalogue which is how we share apps with them.

Itunes Account Password

On some occasions the teachers may need to assist a student download an app onto their device at school. In order to do this we would need to know the password for this account. If you are willing to provide this information for the teachers, who will securely store it, please complete the slip below and return it in an envelope.

Child's Name: _____ Class: _____

iTunes account username: _____

iTunes password: _____
